The Attala butterfly, once thought to be extinct, is making a comeback in Florida. The reason? The increased popularity of [its host plant, the coontie](#).

Coonties are one of the very few native plants used with any regularity by commercial landscapers in north Florida due to their hardiness and year-round green color. Unfortunately, the Attala butterfly doesn't come this far north.

Good news from South Florida where Miami-Dade Commissioners [again vetoed a developers plan](#) to expand the county's urban development border into conservation land to build a massive logistics center. Commissioners will give the developer a THIRD chance at resubmitting a proposal the board can stomach.

---

Nearly 70 exotic species of lizards from around the world [now live wild in Florida](#).

LINK: <https://www.news-press.com/story/tech/science/environment/2022/09/20/nearly-70-species-lizards-have-invaded-florida-everglades/10364872002/>

---

In order for the Inflation Reduction Act to be passed, Senate Democrats had to cut a side deal with West Virginia's coal-backed Joe Manchin to support a spate of [pro-fossil fuel legislation he desires](#). The dirty details of that side deal have come to light and are now the hottest environmental issue on the national political landscape.

More than 30 national, state and local organizations urged Secretary of the Interior Debra Haaland and the U.S. Department of the Interior to formally authorize [the Okefenokee National Wildlife Refuge's bid for World Heritage listing](#). Nomination and inscription on the World Heritage List is the highest honor in the world for sites of ecological importance like the Okefenokee National Wildlife Refuge.

The designation does not impose any new rules and regulations, but would highlight the Refuge's exceptional ecology and increase global visibility, providing opportunities for growth in sustainable tourism, with related economic benefits for local communities, while hopefully, simultaneously, discouraging development in the area.
